

# MATH MADE SIMPLE

with Hope George

**Math Made Simple (MMS)** is an arm of Chags Excel Educonsult which borne out of a passionate crave for mathematical excellence in Early Years and Primary classes. **MMS** is focused on restoring the love for mathematics in our primary school children, if they can get it right at a young age, then one can heave a sigh of relief knowing that the future is almost sure for that child. A child will love math when they love the math teacher.

Lots of people pick up teaching jobs because of the poor economy (as it were) and a need to survive. Beyond all these lie the fact that teaching is a **MINISTRY** only for a few. Sadly however is the fact that having a Masters' degree in Physical and Applied Mathematics or other mathematically related field is not a sine-qua-non for excellent delivery in the classroom, you just have to be **CALLED** into it! So please note that the school is not the problem when it comes to mathematics, the teacher is!

Hence, our major target is on assisting **THE TEACHER (not just the math teacher)** in the strategic delivery of mathematics in the classroom using various tested and proven teaching approach like **Activity Based Learning (ABL)**, **Games Based Learning (GBL)**, **Project Based Learning (PBL)**, **Hands-on experience** and the likes. A teacher's super power lies in his/her ability to transmit knowledge without difficulty and so we believe that **EVERYONE CAN TEACH MATH!**

We therefore humbly invite you and **ALL YOUR TEACHING STAFF** to join us in this edition of **Math Made Simple (MMS)** as we unravel the following:

- ✓ **Understanding and dealing with DYSCALCULIA**
- ✓ **Lesson plan strategies for mathematics**
- ✓ **Practical approach in the delivery of mathematics lessons**
- ✓ **Simple fun mathematics tricks**

**Date:** Saturday 26<sup>th</sup> October, 2019

**Time:** 10am (Please be punctual)

**Venue:** Greenville Montessori Schools,  
110, Ekehuan Road, Opposite Mat Ice,  
Benin City, Edo State.
